

KIM JONG MOON

The First Nuclear Crypto

\$KIMJ **Whitepaper**

Why Cryptocurrency?

The crypto market has disrupted global finance, trade, and many more industries with unique capabilities to solve complex economic and social issues utilizing smart contracts and unique currency features (often called tokenomics).

The \$KIMJ Token is a utility token for KimJongMoon, and a promising ecosystem of entertainment capabilities, financial tools, and wealth generation for our investors.

Our Great Leader's Mission

Uncle Kimy's token not only has limitless meme token possibilities (probably the most marketable token you could ask for) but also implements :

Solid Mechanisms

10% fees on each trade is going to be taxed and distributed as follows :

- 5% will feed the liquidity pool
- 5% will remunerate all KimJungMoon holders

Innovative Identity Use Cases

Kimy's identity will be an asset on several businesses :

- Uncle Kimy's NFTS
- Uncle Kimy's Mini games
- Uncle Kimy's Merch

Unique - Fun - Deflationary

Community-Driven & Fair Launch

We discuss every decision with our community before doing anything (Eg. Our current members chose a fair release in a poll)

Auto-Liquidity Pool

Automatically generate liquidity towards PancakeSwap's pool from every transaction (5%).

Earn \$KIMJ by Holding \$KIMJ

Every transaction (buy and sell) rewards holders 5% according to their stake!

Investor Benefits

Safety

100% of LP tokens burnt
(auditable on BscScan)

Transaction Fees

10 % fees on all transactions
split between holders and
liquidity pool

Uncle Kim Hates Whales!

- Max allowed purchase per transaction capped to 500 Billion (0.05% of total supply)
- \$KIMJ will start with 10 BNB in liquidity so no whales will be present
- The transaction limit gets increased as more coins get purchased to avoid early pump and dumps

The Code of Wealth

10 % fees on all transactions split between holders and liquidity pool

```
uint256 public _taxFee = 5;  
uint256 private _previousTaxFee = _taxFee;
```

Allocating 5% fees on transaction to supply liquidity

```
uint256 public _liquidityFee = 5;  
uint256 private _previousLiquidityFee = _liquidityFee;
```

Avoiding whales by capping the max purchase to 5 Trillion

```
uint256 public _maxTxAmount = 5000000 * 10**6 * 10**9;  
uint256 private numTokensSellToAddToLiquidity = 500000 * 10**6 * 10**9;
```

\$KIMJ Tokenonomics

Total supply : 1,000,000,000,000,000

Price: \$0,000000000001
